

Change of School's MIS

Historically schools subscribing to Starz+ have used SIMS (provided by Capita) for their MIS (Management Information System). This is now changing as more and more schools move across to other MIS providers

What are the Implications?

For your Starz+ platform to be kept up-to-date, regular synchronisation needs to take place ensuring that new accounts are created as users join the school, and that access is removed for any who leave. Currently the following MIS systems can integrate with your Starz+ VLE.

- SIMS
- Integris
- Facility/CMIS
- ScholarPack
- Abor
- iSAMS
- PupilAsset
- Progresso
- Bromcom

We need to be made aware if you are changing your MIS

Please be aware that:

Whilst all student, staff, contacts and school information will be updated there are some exceptions.

- **Writeback** – only SIMS and CMIS/Facility allow writeback for registration purposes.
- **Attendance** – Attendance information can be pulled from all MIS Systems apart from Scholar Pack and Pupil Asset.
